Customer Reviews

Seth B. Young, Ph.D., is an associate professor of aviation and interim director of the Center for Aviation Studies at The Ohio State University. He is the coauthor of *Planning and Design of Airports*, Fifth Edition. Alexander T. Wells, Ed.D., is a consultant and adjunct professor in the College of Business at Embry Riddle Aeronautical University. He is the author of a number of

leading aviation industry texts, including Commercial Aviation Safety, Second Edition and previous editions of Airport Planning and Management.

Great book for my college class. Very informational and good knowledge for the future. I find the aviation industry very fascinating and this book was very interesting. It covers just about everything you will have to think about as a manager of an airport. My class was taught by the airport manager of a major airport and he recommended this book.

This book was received in a timely manner. The print is easy to read and the layout is superb. Able to get to the information when researching and taking class test.

I bought this book because I love aviation in general and thought it would be cool to learn more about the technical details of airports - I absolutely loved the section on the airside/airfield with plenty of schematic diagrams of runways, taxiways, and airfield lighting, etc.

Great content, Valuable information. Hard to follow at times. Book for Course : ASCI 401

This is one of the best book regarding an Airport. If you want to know more about this industry or even working on this segment of the air transport industry, be sure to have this book. Capt Miguel Dau - COO at Guarulhos International Airport (GRU Airport)

The book is an excellent overview of the field of airport planning. I am preparing to interview for a job with a municipal airport and I think it was a very valuable tool in my preparation.

Bought these for the library at the Georgian Military Academy located in GE.

this book is for a college course and I have enjoyed it. I am pursuing a degree in Admin Mgmt and this is helping me to understand the inner workings of an airport system very well. Thanks,
