Customer Reviews

This is the pocket card set that I use the most in daily practice. It has everything I need at the tip of my fingers and it's quicker than any app that I have downloaded so far. Would purchase this again Without hesitation and recommend it to all of my colleagues.

Great for quick look family practice that doesn't deal with birth control often

Great since I don't work OB it is easy for me to glance and get an algorithm without having to fumble with my phone.

Of all the pocketcards I have accumulated (and that is a lot) this is probably my most helpful and the most 'go-to' I use as a FNP.

Has some slightly outdated information, but overall a good reference for beginners.

An easy go to guide when questioning which hormone method to choose for your patient! It fits in your lab coat pocket so you can keep it with you when seeing your female patients with contraceptive needs or concerns. The 2012 antibiotic card is a hit too!

Invaluable!

Came in perfect condition, useful and up to date pocket card. Definitely recommend
