Michael Kroes is an aviation practitioner and educator and has more than 35 years of experience in the field. He holds or has held several FAA certifications, including an Airframe & Powerplant

Certificate, Inspection Authorization, Designated Mechanic Examiner, Designated Engineering Authority, and a Commercial Pilot's License. Professor Kroes has worked for some of the top aviation companies, including Raytheon and Allied Signal, and spent 25 years as a professor and Department Head at Purdue University. Recognized as a leading expert on FAA technician certification, he authored a comprehensive study funded by the FAA. This study was used to develop new FAA technician certification content and guidelines. Dr. Ronald Sterkenburg is a professor at the Aviation Technology Department at Purdue University. He is a certificated Airframe & Powerplant mechanic (A & P), holds an Inspector Authorization (IA), and performs the duties as a Designated Mechanic Examiner. Dr. Sterkenburg's main research interests are in advanced composite materials for aerospace vehicles. He has published many articles, book chapters, and books on all types of aviation maintenance topics.

I could've gotten away without this book at the program that I attend because the teachers explain everything so well.

Some of the pages were missing and one chapter was completely out of order

Amazing book

Extremely good questions that clearly relate to the topic and covers all the required learning modules. Easy to understand the questions and find the related text

Good info but the book is so big that the spine doesn't hold up well after use.

great

The revised edition is disappointing as a text book. I have used the earlier versions during aircraft mechanic school. However this revised edition leaves a lot to be desired.
