## Customer Reviews

I was pleased with all the content they crammed into a 4-page guide, and the visual layout is appealing. However, I discovered the hard way that there are factual errors. For instance, the personal pronouns section has "las" in the wrong column. I bought this guide to help me as I'm learning Spanish in a college class. Instead, I was drilling for days learning incorrectly, and for that reason I gave it only 2 stars. For those still interested, I'll tell you what the content is on the 3 pages this image doesn't show, which I would've really liked to know before buying it.

Hope it helps.

It's just okay- the grammar charts aren't laid out in as intuitive of a manner as I was hoping, particularly the tables for verb conjugation, which is what I really needed. I've used grammar charts for other languages and had better luck. Although this is supposed to be a "quick reference," it's usually easier just to open to the charts at the back of my textbook (which is what I was hoping to avoid through this purchase.) Still, the grammar is correct in essentials, so it gets 3 stars.

I took this with me on a medical mission trip to Guatemala and it was very helpful in working with locals who were visiting the clinic who had no knowledge of English. It is also very helpful when writing speeches or talks in Spanish. Well worth it. The plastic coating is perfect for use when traveling outdoors in Latin American climates or elsewhere.

A great study guide to use as a review- I take it traveling and avoid the need for study books or texts.

I bought this for my son to help him review for his high school required Spanish class. It contains a lot of useful information in a very compact space and its bright colors make studying at least a little pleasant.

Good

well done

Very useful and easy to use item. This really helps both me and the kids to remember some of the words taught in class and it isn't difficult.
