Cavern And Cave Diver Workbook

Synopsis

This workbook captures the best current practices in overhead instruction into one convenient workbook that will last a student from initial cavern training up through the full cave certification and that provides a great resource for reviewing important material by the seasoned cave diver. The workbook has been specially crafted to match the current NACD Standards & Procedures. This will enhance the quality of the experience for the student and provide a common standard for training at all levels. The workbook is upwards of 150 pages and includes useful outlines, photos and illustrations, cave maps, discussions and extensive calculations for gas math.

Customer Reviews

The information this book is great and we'll presented I would have rated this 5 stars if everything was complete. But many of the pictures just will not show. If I knew this beforehand I would have spent the extra money and purchased a print copy. Other than missing pictures and sometimes sentences not properly spaced, It's a great read. It will not replace a quality cavern/cave instructor but is a great supplement to the training.

great reference material before taking on overhead environment Open water folks should get something from it as well

Love it! Purchased as a hard copy to use for refreshing my memory as I'm still in the process of taking my cavern/intro cave diving course.

Great read

As the owner of ScubaBoard.com I get exposed to lots of books about diving. Most are filled with a generous amount of ego and not enough insight. This was the opposite. As a collaborative effort, it's still easy to read, clear and concise. It gives an outline for cave diving survival. However, it should be noted that no book can ever replace a competent instructor for an overhead environment. Read the book, but then submit yourself to learn Cave Diving the right way from a certified NACD Cave Diving Instructor. Your loved ones won't be grieving about your untimely death if you do.
