meh. Not much to this. Lacking in pictures it fails to do much else other than take up space on my Kindle. Fushigi Ball Secrets is something that should have had at least diagrams if not pictures but instead its nothing but text with a couple of web addresses at the end that are nothing you probably haven't seen after a Google search on Fushigi. Even the text is lackluster and poorly organized. I found it hard to get past the first two pages of jumbled and dry info. Free is exactly what this is worth and even that might be a bit much.

Save your money, you receive better instructions on youtube than this poor excuse for a book

Disappointed. I expected a discussion on contact juggling and how to manipulate the ball, not quotes from how many web searches someone did. Poor formatting, little info and no pictures or illustrations. I used my prime membership to get the book and now I have this clogging my kindle for a month. Thankfully I did not buy it, or I would really be tweaked.
