STEVEN O'HARA, Professor of Architectural Engineering and Licensed Engineer

Professor O'Hara received his Master of Architectural Engineering from Oklahoma State University, and has been a member of the teaching faculty at the School of Architecture since 1988. His primary areas of interest include the design and analysis of masonry, steel and timber structures, with special interest in classical numerical structural analysis and the design of concrete structures. Professor O'Hara is one of four faculty members in the Architectural

Engineering program at OSU, and as such teaches courses in the AE program at all levels; he enjoys his close mentoring relationship with the students in the AE program at OSU, as he also performs the role of their academic advisor. Outside the OSU classroom, Professor O'Hara is an Affiliate Professor of Civil Engineering and Architecture in "Project Lead the Way", a nationwide program for high school students. He trains the high school teachers responsible for introducing engineering principles into the secondary curriculum, through project based learning, and has authored the workbook for the curriculum. As a faculty member, Professor O'Hara has received numerous awards; in 2001 he was the honored recipient of the first Melvin R. Lohmann Professorship, in 1999 he received the Chi Epsilon Excellence in Teaching Award, and in 1995 he was recognized as the Halliburton Excellent Young Teacher for the College of Engineering, Architecture and Technology at OSU.

I used this book (and ArchiFlash) to pass CDS and PPP on the first try. I highly recommend this book and the ArchiFlash study app. As an aside: DO NOT BUY THE ARE 5 VERSION OF THIS BOOK! In contrast to the ARE 4 book, the new version is full of errors and not worth the paper it is printed on. Wait for edition 2.

This is one of the two leading study guides for the Architectural Registration exams. While I already had access to the competing Kaplan study materials, I found that the books were not concise enough for me. This book is extremely concise and dense with information. It condenses all you need to know for the 7 ARE exams into a single book instead of spreading it out into several books with repetitive information. Since most architects take their exams while working full time jobs, it's very important being able to absorb as much information as possible in a short time span. This book allows us to do that. Not only is it much more compact than the competing Kaplan system, it's also much more affordable. Very happy with the purchase.

Do not rely on this book 100%. I just failed for the second time my ARE exam for CD section despite I did study this book several times. I did study to the point that I have memorized all the section word by word. There were still several concepts and even terminologies in the exam which are not covered by this book. I hated that surprise in the exam. It was like a clod shower. There was lot of terms that sounded Greek to me during the test despite all of the preparation. It is a good book overall. But it shouldn't be your only reference.

thanks for a great deal fast shipping

Lot's of material, part of the suggested reading for passing the ARE examination. This is one of the study tools for passing the ARE.

If you are studying for the ARE, you will know that there are lots of resources out there and they are all ridiculously expensive. This is the one stop book you need, especially if you have been working in the industry for any given period of time. You won't need anything else.

Thi one is a "Bible" for an architect getting their licensure

This is a must have for ARE preparation. This book supplemented with Kaplan prepares you adequately for all 7 ARE tests. If you know this book end to end you will definitely pass your exams. Only issue is sections are set up for each exam but study materials overlap for all exams. Be sure to cover as much as you can.
