Business Statistics: For Contemporary Decision Making, 9th Edition

Synopsis

Business Statistics: For Contemporary Decision Making, 9th Edition – continues the tradition of presenting and explaining the wonders of business statistics through the use of clear, complete, student-friendly pedagogy. Ken Black's text equips readers with the quantitative decision-making skills and analysis techniques they need to make smart decisions based on real-world data.

Customer Reviews

this was a reasonably priced book I got for my class in statistics in college. was great

This is a great tool for a study aid, but it can not be used to ace an exam without going to class or taking good class notes. It only explains majority opinions on topics, and often professors will cover both majority/minority opinions and their applications to be tested on them. Additionally, although it does touch on the Restatement,

This was perfect, and I am not a fan of statistics. Luckily this book is required for the first and

second stats class at my Uni - and I got it for just 5\$:D

This is THE BEST copy of this book out in circulation. Cannot find a better edition anywhere!!!!Price was good, shipping was road runner fast, and all is well.It's a required college book for goodness sakes, what else can i say?

Good as described!!!

It was in great condition!

I cant complaint about this product, it came in a timely manner, maybe it took a day or two longer but for the price i will say its worth the wait. The book has some scratches but that's about it. Really good!!. Thanks

Book was in good condition except the fact that it was a binder book instead of a hardcover. It never said that it was a binder book....disappointed that it was loose leaf and didn't even know
