Customer Reviews

This is a wonderful aid to identifying butterflies or their larvae (caterpillars) that are eating your parsley and dill. My sister started a butterfly garden this year and puts a star on this card next to each butterfly she identifies. We both used the card almost every day this summer.

Great overview of the local butterflies. Organized to easily find any given butterfly or moth. Is water proofed, so I can leave it outside and have it within reach when I need to identify a butterfly in my yard.

Very easy to use. It has beautiful close-up pictures to identify individual types of butterflies and their caterpillar and it even lists host plants for each butterfly. Because it is a fold-out, laminated 'brochure' its much easier than using a book to identify butterflies as they visit my yard.

Good job

OK for identification but did not contain the specific names of host and nectar plants which is what I was seeking.

This is an excellent guide for identifying butterflies in the Mid-Atlantic Region.
