National Geographic Readers: Lizards

Synopsis

From geckos to iguanas, komodo dragons to chameleons, lizards are about the most awesome animal around! They inhabit every continent except Antarctica. Some are lethal. Some change color. Some have suction cups on their feet. There is enough fascinating information about these animals to fill an entire library of readers! But we've taken the absolute coolest information about the coolest animal and compacted it in this fascinating level 2 reader, perfect for anyone who loves slippery, slimy, creepy, and crawly. This high-interest, educationally vetted series of beginning readers features the magnificent images of National Geographic, accompanied by texts written by experienced, skilled children's book authors. The inside back cover of the paperback edition is an interactive feature based upon the book. Level 1 books reinforce the content of the book with a kinesthetic learning activity. In Level 2 books readers complete a Cloze letter, or fun fill-in, with vocabulary words. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeoed.org/commoncore for more information.

Customer Reviews

LAURA MARSH is a long time contributor to National Geographic Children Books. She has written a large number of books in National Geographic Readers series and also in Mama

Mirabelle and Toot and Puddle series.

Yes, these books all have very good info, but are not the same quality as the regular National Geographic magazine. I ordered 4-different National Geographic readers, and was disappointed with the smaller size of these magazines.

My son's new interest is lizards. This book is colorful and engaging. It is perfect for him.

A terrific book for reluctant readers. I would recommend it for boys age 8-11, especially if they don't like reading. The topic is high interest. The pictures are National Geographic quality. My young male students chose these National Geographic Kids books about reptiles first for independent reading time.

Great book for research

Grandchildren love these books

Granddaughter loves

This was a colorful, short book about lizards. I wish it was a little longer. My 7 year old read through it very quickly, but learned a few new things. She really enjoyed it and I thought it was priced appropriately.

The National Geographic Readers are perfect for Early Readers. My son loves animals and facts about animals more than fairytales and fiction books. These books are perfect for boys who want to know more about creatures and insects. I've ordered 5 or 6 and each NG Reader was well done and accurate. The 4 for 3 promotion makes them a good bit cheaper than buying retail, also. He likes lizards so this was perfect for him.
