very small pocket guide that appears to be a book. The trifold has only male versions of the birds and very limited descriptions. I would keep looking and skip this one.

Great quick reference bird guide so my mother in law doesn't have to flip through pages and pages of information. Love that it's laminated to protect it from spills when she gets over exuberant in her bird findings;)

This is a terrific quick bird reference. Great pictures to identify birds

This is not what I thought it was going to be. I thought I was getting a booklet. This looks like something you picked up at an IDOT rest area, laminated and charged me \$7.00 for. I feel as if I have been ripped off.

I would have gave this five stars if the pictures of each bird were not drawings but actual pictures of them. But over all it still works to identify birds in the area.

Love it. I sit out side with it.

It has a plastic coating that allows for damp environment without damage. Easily arranged to find the birds that you are viewing and great pics.

This is one of many of these products I have purchased. They are easy to hike with and very complete for the limited printing area. They have many flora, birding, and nature ones available!
