Kindergarten Super Math Success: Activities, Exercises, And Tips To Help You Catch Up, Keep Up, And Get Ahead (Sylvan Math Super Workbooks)

Synopsis

****3 BOOKS IN 1!****Building a strong foundation in basic math is essential as kindergarteners prepare to advance to more difficult math concepts. The activities in this 3-in-1 Super Workbook are designed to help your student become familiar with numbers and counting, patterns, shape recognition, measurement, and more. They will help your child catch up, keep up, and get ahead—and best of all, to have lots of fun doing it! Here are some of the great features you'll find inside:
BASIC MATH Pond Crossing To help the frog jump across the pond, children follow a path of numbers, reinforcing number sequence.
MATH GAMES & PUZZLES Picking Pairs Drawing lines to connect objects that belong together, like a paintbrush and watercolor set, pail and shovel, or animals with their homes, sharpens sorting skills.
SHAPES & GEOMETRY Off the Wall By matching framed pictures to faded shapes where they used to hang on a wall, children reinforce their knowledge of shapes. Give your child's confidence a boost with Kindergarten Super Math Success!

Book Information

Customer Reviews

Sylvan Learning is the premier provider of tutoring services for grades pre-K to 12 in North America. With over 850 locations in the United States and Canada, Sylvan provides individualized tutoring services, both in centers and online, in subjects including math, language arts, writing, study skills,

and more. Sylvan's proven process and personalized methods have helped more than two million students unlock their academic potential. With products based on solid and scientific research, Sylvan is committed to both quality education and to helping children discover a love of learning!

My almost 5 year old son is homeschooled and he loves math and numbers. He enjoys this book very much and I am sure the bright illustrations help. The book is thick and pleasing to a child's eye. My one complaint is the excessive chapters on shape identification. My son knows his shapes and I'd say half the book is strictly work pages devoted to identifying shapes. Most of it will just be skipped.

We use these to supplement our home school activities. Very clear, concise instructions, great color pages and images, answers in the back, such a wonderful resource, especially for the price. I DO wish the pages were perforated, that is about the only complaint I have. The past 2 years we have used these, I just take an evening and gather all the Sylvan books we have bought and take a couple hours tearing out the entire book being careful not to rip pages in half as it can be easily done if in a hurry, hole punching it and storing it in a 3 ring binder. That way, all year I do not have to be tearing out X amount of pages per day or week etc. and they are all handy and ready to go. I would pay extra to have them perforated! haha But despite the extra work (which technically isn't all completely necessary but we've found it impossible to use without at least tearing out the pages) I still highly recommend these lesson books.

my daughter loves this book, We thought we could help her before she started school, Now she is so far ahead of her classmates! Don't hesitate buy these for your children during before and after school! only 30min a day will make all the difference!

My 4 year old loves math. He's already gone through 2 other math books. The pages are simple and fun. We work on several pages per day and he loves it.

I got this to work with my daughter on her numbers over the summer. She enjoys tracing the numbers and doing the activities. We haven't gotten very far in it yet, but she likes working on it and that's half the battle!

Grandson used it.

Daughter enjoys these and user friendly.

Great book but my kindergartener got bored quick because of how easy it was. I suggest doing these before they actually go into kinder.
