Petroleum Reservoir Fluid Property Correlations

Synopsis

Large sets of petroleum fluid data exist for the various reservoir conditions and properties that occur in practice. Petroleum Reservoir Fluid Property Correlations, written by three internationally well-known and respected petroleum engineers, is the result of several years of exhaustive research that gathered data sets from databases all over the world. The data were compared against the results of many published correlations of fluid properties in order to find the "best in class" required in the petroleum industry. Those findings are offered here as recommended use in reservoir engineering calculations. The data sets cover natural gases, reservoir oils, and reservoir waters (brines). The result of this research project is the best correlation for each fluid property.

Key Features: * Best-in-class correlations contained in one volume * The most accurate data for reservoir engineering calculations * Correlations that cover all reservoir hydrocarbons and brines
Petroleum Reservoir Fluid Property Correlations will prove to be a valuable resource for reservoir engineers, production engineers who need to determine which set of correlation equations are most useful for their work, and graduate-level reservoir engineering courses.

Book Information

Hardcover: 232 pages

Publisher: PennWell Corp. (November 16, 2010)

Language: English

ISBN-10: 159370187X

ISBN-13: 978-1593701871

Product Dimensions: 0.5 x 6 x 9 inches

Shipping Weight: 1.2 pounds

Average Customer Review: 2.0 out of 5 stars 1 customer review

Best Sellers Rank: #888,188 in Books (See Top 100 in Books) #211 in [Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Mining](#) #225 in [Books > Engineering & Transportation > Engineering > Energy Production & Extraction > Fossil Fuels > Petroleum](#) #2614 in [Books > Textbooks > Science & Mathematics > Mathematics > Statistics](#)

Customer Reviews

REALLY boring, but I needed for a class.
