Customer Reviews

ELIZABETH CARNEY has written numerous books for children, including several National Geographic Readers, as well as National Geographic Kids Everything Big Cats and National Geographic Kids Everything Dolphins, and two titles in the National Geographic Face to Face series.

This was the perfect book to help my 8 year old with her science fair project. The book is well written and engaging for kids her age.

Perfect for my Mars loving 6 year old.

We handed out this book along with Robots as party favors to a bunch of 5 and 6 year old boys and girls. It was amazing how a hush fell over the room as everybody started reading! These books are really great for little kids and a lot of fun. My son loves telling us the little jokes and riddles spread throughout the books!

My 5-year-old was intrigued by this book, even if he isn't quite "there" to read it himself. Lots of facts and colorful photos to indulge in.

Science books at this level is really good. My 5 year old is very much interested in learning about planets and this book is great introduction as well as motivate kids to read more.

for my Grandchildren, their mother says they love the stories, super great for all young ages, remember reading to your children will guarantee their success in later life. Even talking or singing will have a beneficial effect

This was just what my grandson wanted. Lots of great pictures of Mars and Mars landers

Bought this for our 8 yr old grandson. Think he will like it a lot.
