It's awesome to read as a woman. I picked it up as a writer. Most romance novels have male leads as complete jerks, yet the women still fall at his feet. I've been in more than enough situations in real life where that approach made me gag and run away. It's unrealistic and I wanted to find a real approach that man take. I was happy to see that I recognized these tactics in my life. Some guys are actually good at approaching women! I understand now more where they are coming from, too. Not only is this book helpful when it comes to understanding how a man approaches you, but it is highly entertaining. The author wrote it in a light and easy way that was refreshing. It's obvious that he's researched and done this a lot. He has it down pat. I have more understanding as to how I want to write my male leads. The typical jerk in most novels will not be present in anything I ever write. I suggest this for men, but also for women. Let's make it a little easier on them.

It is always good to know how a man thinks, so for the women out there I would read this book and get some good tips on how they think and what they go through. The book said the 90% of communications is non verbal, so trying to understand one another can get tricky. This book will

really help you if you are struggling with meeting someone and do not know what to say or how to communicate. Tips on the direct approach and the indirect approach.

Awesome! I have had a couple of bad relationships and need to get back out there. This book includes a lot of great tips that I hadn't thought of and got me really motivated to try them out! It also explains what you shouldn't do and how to read her body language. If you need some help getting a girlfriend and haven't succeeded yet then you can't go wrong with this book! Really enjoyed it! Worth reading book!

This book is full of helpful pieces of advice. Yeah, we all have already known that first rule. 'The male must be confident.' Or 'you won't have second opportunity to make the first impression.' However, sometimes you just need this kind of analysis which you can find in this remarkable book.

I love James Beckett's Woman Whisperer. As a woman, it's always interesting to read about a man's perspective and get an idea about where men are coming from. The book flows well and is easy to read. I highly recommend it if you want to get an insight into what men really think.

Finally! A No-BS approach, no manipulation but exactly what you need to be natural with Women. I know now the exact steps to Breaking the ice with my Date

This is a great relationship book on The Woman Whisperer. All of the things, tips and tricks that I need to know on how to flirt and charm any woman are already included and well guided inside. James Beckett has done an incredible awesome job in compiling and creating this relationship book. Also the unique part of this book is the compilations of the tips on how to flirt, how to impress a woman and how to leave her wanting to see you again. All details are great and interesting. This book is really a great resource for people who want to understand and flirt women. I highly recommend this book to all.
