# The Power Of Space And Reincarnation

## Synopsis

Space is considered to be nothingness by many. But after all it is the background in which we see everything. It is against space and within the dimension of time that we experience everything we experience. Space and time are the two basic dimensions of our world but are uncommonly illusive. We can say they are our way of thinking of the universe as being a system of patterns. And our awe at the vastness of space may be man's astonishment at himself. We reconsider our position as an "insignificant" speck in the vastness of the universe.

## Customer Reviews

I have listened to several of these collections of Watts' lectures. This is a more metaphysical set, less centered on human personalities and more centered on the Zen Buddhist view of how the universe works. Some of the arguments approach 'The Secret,' describing vibrations in the universe and such, but Watts acknowledges that some of these seem absurd now, but may be later supported by quantum physics. If I thought this was actually absurd as 'The Secret,' I wouldn't have given it 5 stars. Watts is not a rationalist, but he is a very rational speaker. His arguments will either persuade you, or at the very least give you respect for the Buddhist mindset on the nature of the universe. -Ryan Mease
