## Customer Reviews

"Perfect to keep the 'Are we there yet?' questions at bay for hours, the Almanac contains an overview of all 195 countries and the 50 U.S. states, fascinating articles about animals, culture, science, history, nature, going "green," weather, technology and a great deal more, first-hand accounts by Nat Geo Explorers, games, quizzes, activities and crafts, as well as over 900 amazing photographs." - New York Amsterdam News"National Geographic Kids Almanac 2016" is an excellent book for kids who love facts in small bites, along with lots of

related color photographs. The almanac covers a wide variety of subjects and activities that appeal to young readers 8 to 14. While kids will be attracted to the book by its many photographs and catchy topics, parents will be delighted with the educational content." -- About.com

Based on content from the award-winning and top-selling children's magazineÂ ª National Geographic KidsÂ ª and National Geographic Kids books, theÂ ª National Geographic Kids AlmanacÂ ª is created by multiple National Geographic contributors--including researchers, photographers, content experts, and educational specialists.

My 8 year-old son loved, loved the 2014, 2015 edition, so of course, I had to get the 2016 edition. From a kid's point of view, he said the photographs make the facts seem more interesting. From an adult point of view, I totally agree. There's just so many interesting stuff in the almanac. There's information on big cats, demolition, planets, Houdini, presidents, maps, and even planting a butterfly garden. There's a very detailed index in the back. I can see this book as a good source of school project ideas and reference when he heads to third grade next year. From our experience, even when my son was too young to read, he liked looking at the pictures and asked all kinds of questions. My son highly recommends this book to other kids and so do I!

AMAZING!!! I have a 10 year old girl and she loves this book. It is full of information. There are cool events for the year in the beginning of the book where it tells you when Earth Day is and things like that. Then you have animals...tons and tons of animals, science, space, technology and on and on and on. There is so much information packed into this book. It is 350 pages of information that kids love to read and learn or at least mine does. I even like flipping through the book. It also has maps of the earth and of the continents with facts on each page. Then it has flags of every country with different facts about every country. Maps of the states with state facts. Every president is listed.... There is just so much information!!

I bought 2015 Almanac last year for two of our grandkids aged 7 & 9. All of their parents commented on how much they loved the books. The parents were even enjoying them. The books have eye-catching graphics, illustrating fun facts that appeal to kids of all ages. I hope they continue to print these because I will be buying them each year.

This is the 3rd year in a row that I've gotten one of these almanacs for my now 13-year-old

granddaughter. They are so full of really interesting and well displayed information that it's still on the 'must have' list even now that she's a teenager.

I bought this for my 8 year old boy and he LOVES this book! It had great pictures and TONS of facts/info for kids. The info is delivered in a way that grabs my sons attention and amuses him! Makes him WANT to read more and more!! Highly recommend this book for anyone who is considering buying it!! Some fun facts we learned - If you tried to drive to the sun it would take 190 years ( it gives the actual miles also ) A Basset Hound weighs as much as an elephant heart.....Squirrels sweat from their feet .....

This was a present for a 9-year-old (going on 10) who loved the 2014 and 2015 editions. His mother says he brings the Almanac along wherever they go. He mailed me a thank you drawing for the 2016 edition and hinted broadly that next year he'd like the 2017 edition. So if you know a youngster who is interested in science, the National Geographic Kids Almanac is an excellent gift.

My daughter is a trivia buff who loves to read and always enjoys reading the yearly kids' almanac from National Geographic. The book has dynamite photos and entertaining, fascinating writing.

I bought this for my homeschool library. My Son is in love with this book and all the Animal facts in this 2016 Almanac. Very nice quality hard back book. It should hold up to all the use over the years.
