# Subtraction Facts Math Practice Worksheet Arithmetic Workbook With Answers: Daily Practice Guide For Elementary Students And Other Kids (Elementary Subtraction Series) (Volume 1)

## Synopsis

Gift your child endlessly rewarding skills they can cherish lifelong. This book has more than 3100 subtraction facts for daily practice by students. Each page has 2 different sets consisting of 18 problems each. It is recommended for students to attempt 1 set daily for consistent practice. Book starts with addition strategies to help students grasp basic concepts and get started. Once students start gaining confidence in individual facts, they can review their knowledge by solving mixed facts. Book can be used to track practice time for each set. Date and time can be recorded at top of each page. Answer to each problem is given at the end of the book. Knowing subtraction facts is helpful not only in academics; we frequently use subtraction in our daily lives too. Just like learning to walk before you can run, learning subtraction and familiarizing yourself with numbers are building blocks for other math topics taught in school. Mastering the basic math facts develops automaticity in kids. Automaticity is the ability to do things without occupying the mind with the low level details that are required; this is usually the result of consistent learning, repetition, and practice. For instance, an experienced cyclist does not have to concentrate on turning the pedals, balancing, and holding on to the handlebars. Instead, those processes are automatic and the cyclist can concentrate on watching the road, the traffic, and other surroundings. Until students have developed sufficient sensory-cognitive tools supporting access to symbolic memory, they will not be able to image, store or retrieve all of the basic facts with automaticity. Therefore, students need a comprehensive, developmental, and multi-sensory structured system for developing automaticity with the facts.

## Book Information

Series: Elementary Subtraction Series

Paperback: 108 pages

Publisher: CreateSpace Independent Publishing Platform; 1 edition (August 7, 2016)

Language: English

ISBN-10: 1536961558

ISBN-13: 978-1536961553

Product Dimensions: 8.5 x 0.2 x 11 inches

Shipping Weight: 12 ounces (View shipping rates and policies)

Average Customer Review: 5.0 out of 5 stars 9 customer reviews

Best Sellers Rank: #26,062 in Books (See Top 100 in Books) #25 in [Books > Science & Math](#)

## Customer Reviews

Bought for my daughter to practice in our homeschool. I love how these are easily reproducible so I can give her worksheets in random order. They're well thought out and well put-together. Would buy again if I needed to.

All three books, subtraction, addition and multiplication were great tools I used with the grandkids over the summer.

I used this with a young cousin, so I like that there are lots of practice sheets.

It came on time. Even though I order the wrong book, someone else can use it.

Good to use as a daily review in the classroom.

as expected. Lots of practice sheets.

This book helps to practice and memorize like Kumon does, If your child learned subtraction operations by finger counting then this is a good starter book to practice before starting borrowing numbers for subtractions. I bought this book for my son to practice subtraction. The book can be divided into two parts single digit and two digits subtraction. Each page comes with set I and II for practice. One can become familiar with subtracting each numbers starting from zero like 1-0, 2-0...20-10. There is no borrowing with either single-digit and two-digit subtractions. It also comes with Answer Key so that once finished kids can verify their answers using Answer key. And can be corrected if they make mistakes which is common while learning.

This is great book to practice subtraction. My son who is in 4th grade has been using it and it has helped him to get fluent with subtraction. This book is similar to practice sheet provided by Kumon but obviously at very low price. I would strongly recommend this book to elementary school kids.
